**Re: Marine Terminal 1 South Site  
Feasibility Study Scoping Document  
ECSI No. 2642**

Dear Mr. Struck:

The Port of Portland (Port) has prepared the Feasibility Study (FS) Scoping Document for the Marine Terminal 1 (T1) South Site. The T1 South FS will develop and evaluate potential remedial action alternatives for contaminants of concern (COCs) in the affected media and recommend an alternative for implementation at the site. The attached FS Scoping Document identifies the overall scope of work for the FS and presents the remedial action alternatives proposed for detailed evaluation. Three copies of the draft T1 South FS Scoping Document are submitted to DEQ for prompt review and approval.

Please contact me at (503) 944-7533 with any questions.

Sincerely,

Joe Mollusky  
Environmental Project Manager  
Property and Development Services
